KNIGHT INTRODUCES MEGATON™ DRILLING JAR PRODUCT LINE

Knight Oil Tools™ has introduced its Megaton™ Drilling Jar product line and has opened its new Megaton™ Jar Facility in Broussard, La.

The new product line features the Megaton Drilling Jar with Ulti-Torq™ connection and the Megaton Energizer, which maximizes the drilling jar. The products are designed to help free stuck drill pipe by providing an impact or “jarring” effect upwards or downwards on the stuck pipe. Incorporating features of both hydraulic and mechanical drilling jars, the unique design combines both hydraulic time delay release and a mechanical lock mechanism in one relatively short double acting jar.

“The introduction of the Megaton Drilling Jar into our inventory of rental tools is a natural extension to our existing product lines,” said Doug Keller, Vice President of Sales and Marketing. “Many of the wells that utilize our drill pipe will have a need for the drilling jar as they are a critical component of most drilling bottom hole assemblies.”

The new 12,000 sq ft jar maintenance facility, located at 1001 Petroleum Pkwy., provides service and maintenance operations for the newly introduced Megaton drilling and fishing jar product line.

Focused on providing “zero failure” equipment and service since 1972, Knight Oil Tools has grown to include Knight Fishing Services™, Knight Well Services™ and Knight Manufacturing™. The company is the largest privately held rental and fishing tools business in the oil and gas industry. Knight has an extensive inventory of high-quality products necessary for safe, efficient and productive oilfield projects.

Knight’s 30+ locations across eight oil-producing states serve all phases of an oil well’s lifecycle from exploration to abandonment. For more information about Knight, visit www.knightoiltools.com.
