Knight Oil Tools Expanding Corporate Headquarters

Knight Oil Tools is adding to its existing 96,400 square foot corporate facility that was constructed in 2006 with an adjacent 18,000 square foot office building.

The new construction, which is slated for completion in early 2012, will add approximately 60 offices and will house the Information Technology department and several administrative support services.

“The sheer idea that we would need to expand our corporate facility within such a short time is amazing,” said President Mark Knight. “The expansion that we have experienced throughout the United States and Internationally is due to the dedication of our employees, quality service and premium products.”

The design of the new building will fall in line with that of the existing structure and will be designed by award-winning architect Don Breaux and Associates.

Focused on providing “zero failure” equipment and service for 40 years, Knight Oil Tools has grown to include Knight Fishing Services™, Knight Well Services™ and Knight Manufacturing™. The company is the largest privately held rental and fishing tools business in the oil and gas industry. Knight has an extensive inventory of high-quality products necessary for safe, efficient and productive oilfield projects.

Knight’s 30+ locations across eight oil-producing states serve all phases of an oil well’s lifecycle from exploration to abandonment. For more information about Knight, visit www.knightoiltools.com.
