BROUSSARD, La. (March 13) - Oilfield inspection specialist, Tri Drill Services, has launched a newly redesigned website at www.tridrill.com, announced Vice President, Sid Lyons.

To help familiarize and connect its current and prospective clients with the company, the new Tri Drill website includes company information and background and comprehensive information about its range of services.

“Tri Drill has recognized considerable growth over the past several years from our facility to our service line to our level of people,” said Lyons. “This site highlights those expansions and informs people of Tri Drill’s capabilities.”

Tri Drill Services performs NDT inspections on drill pipe, tubing, bottom hole assembly tools, heavy-lift components and handling equipment throughout the Greater Gulf Coast. Certified based on ASNT guidelines, Tri Drill’s inspectors are tested by an independent source, IPIA or a Certified ASNT NDT Level III Instructor.

Tri Drill’s services are based out of a full-service facility in Broussard, La., featuring a 46-acre yard and a facility in Conway, Ark. Drill Pipe and BHA units are mobile and available for both land and offshore drilling operations. For more information, visit www.tridrill.com.
